

Communicate with remote workers without email with...

...TotalMobile Bulletins

Bulletins is a secure notification broadcasting application allowing administrators to alert select groups of users with important job-related notifications without setting-up and managing multiple email accounts.

Features

- Keep your remote workers informed with regular or ad hoc notifications
- Tailor messages to different groups, types of work or location
- Send communications to remote workers without email accounts
- Alert workers instantly of dangers in their area
- Record worker acknowledgements
- Works as an independent application and in conjunction with other TotalMobile applications for enhanced functionality

Benefits

- Helps protect lone workers
- Restricted responses avoid employee abuses i.e. time spent on email
- Record acknowledgements to aid duty of care
- Requires less network administration time than email and is cheaper than texting

TotalMobile Bulletins run on Windows Mobile devices and integrates seamlessly with back office systems and databases - complimenting your existing IT infrastructure.
