

Access a complete work case history while on the move with...

## ...TotalMobile Folio

**Folio** is a case history retrieval application designed to provide mobile workers with controlled access to records, reports and work relevant to the current job or incidents.

### *Features*

- Integrates with multiple databases and 3<sup>rd</sup> party applications simultaneously
- Provides mobile workers with access to relevant case histories and documentation while in the field
- Downloads information in the background for fast access
- Data purge facility removes case history information from devices after use to protect clients against unauthorised access
- Works as an independent application and in conjunction with other TotalMobile applications for enhanced functionality

### *Benefits*

- Enable case workers to make informed decisions in one visit
- Save time by allowing workers access to vital information quickly
- Eliminate office visits spent gathering records
- Remove need to return to the office between visits
- Save paper to avoid workers printing and carrying case history document to and from jobs

**TotalMobile Folio** runs on Windows Mobile devices and integrates seamlessly with back office systems and databases - complementing your existing IT infrastructure.
