

## Complete and submit timesheets for a team of workers from one device with...

### ... TotalMobile TeamTime

**TeamTime** is a mobile 'punch-card' application allowing supervisors and foremen to record and document work and productivity of groups of field-based workers from one mobile device.

#### *Features*

- Manage attendance and 'Clock-in/clock-out' whole teams in seconds with barcode/RFID compatibility
- Customisable Time Types to suit any workflow
- Can keep jobs on track by notifying of job overruns
- Submit periodical updates to corporate systems
- Works as an independent application or within other TotalMobile applications for enhanced functionality i.e. use with Job Management to receive team tasks, record task completion and update progress within overall Projects

#### *Benefits*

- Saves money by removing the need for administrative paperwork
- Saves time by eliminating manual group timesheets
- Empower management by providing accurate and up to the minute information
- Can be integrated to most Payroll systems for quick and accurate salary calculations

**TotalMobile TeamTime** runs on Windows Mobile devices and integrates with back office systems and databases - complementing your existing IT infrastructure.
